AVINESHWARAN

UI/UX DESIGNER

CONTACT

9791464023 avineshwaran1910@gmail.com Kallakurichi , TamilNadu , India

EDUCATION

2024 - Present **B.E. Computer Science and Engineering** 3rd year

Rajalashmi Institute of Technology , Chennai

PROJECTS

Smart Resource Framework Allocation

Integrates ML-driven workload prediction with OS scheduling primitives (Round Robin, Priority Scheduling) and DAA algorithms (Greedy, DP) to dynamically distribute CPU/memory across competing processes. Reduces average wait-time by prioritizing predicted high-burst tasks before queue saturation.

Threat Detection System

Simulates active database compromise scenarios (insertion / deletion threats) via a Telegram Bot interface. Implements real-time DB recovery logic, rollback transaction chains, and alert propagation. Designed to stress-test incident-response pipelines and validate backup integrity under adversarial conditions.

ACHIEVEMENTS

1st prize - Designathon (RIT)

Won a hackathon by designing and developing a solution focused on Students' Academic Data Management and Environmental Management, aligned with the Sustainable Development Goals (SDGs). Demonstrated problem-solving, creativity, and teamwork to develop an impactful solution.

EXPERIENCE

Intern - RD InfroTechnology

Successfully completed a UI/UX Design Internship, gaining practical knowledge of user interface design, user experience principles, wireframing, prototyping, and creating user-friendly digital interfaces. Improved creative thinking and design skills while learning industry-standard design practices.

SKILLS

Language : HTML , CSS , Reactjs , SQL , Python

Tools : Github , PowerBI , Figma
